

HEAVY DUTY STAINLESS STEEL CONVEYOR NO: 110

Gravity Roller Conveyor

THE APPLICATION: Handling large totes, drums and palletized loads in a washdown environment

THE PRODUCT: Stainless Steel Chain Driven Live Roller Conveyor and Gravity Roller Conveyor

THE INDUSTRY: Food Manufacturing

THE NEED: A food manufacturer needed to transport totes, drums and palletized loads weighing 2500 lbs or more.

THE SOLUTION: Omni Metalcraft Corp. provided Heavy Duty CDLR and Gravity Roller Conveyor with stainless steel materials and washdown duty components. The conveyor was designed to withstand heavy loads as well as meet the customer's washdown design criteria.

- 304 stainless steel frames, supports and roller assemblies
- Washdown rated motors and reducers
- Custom drive specifications
- Zoned pallet accumulation
- Continuous welds available
- Mill finish and glass bead blasted finish available
- Corrosion resistant chain
- Up to 4000 lbs. load capacity
