

TRANSFERRING EMPTY PALLETS

NO: 209

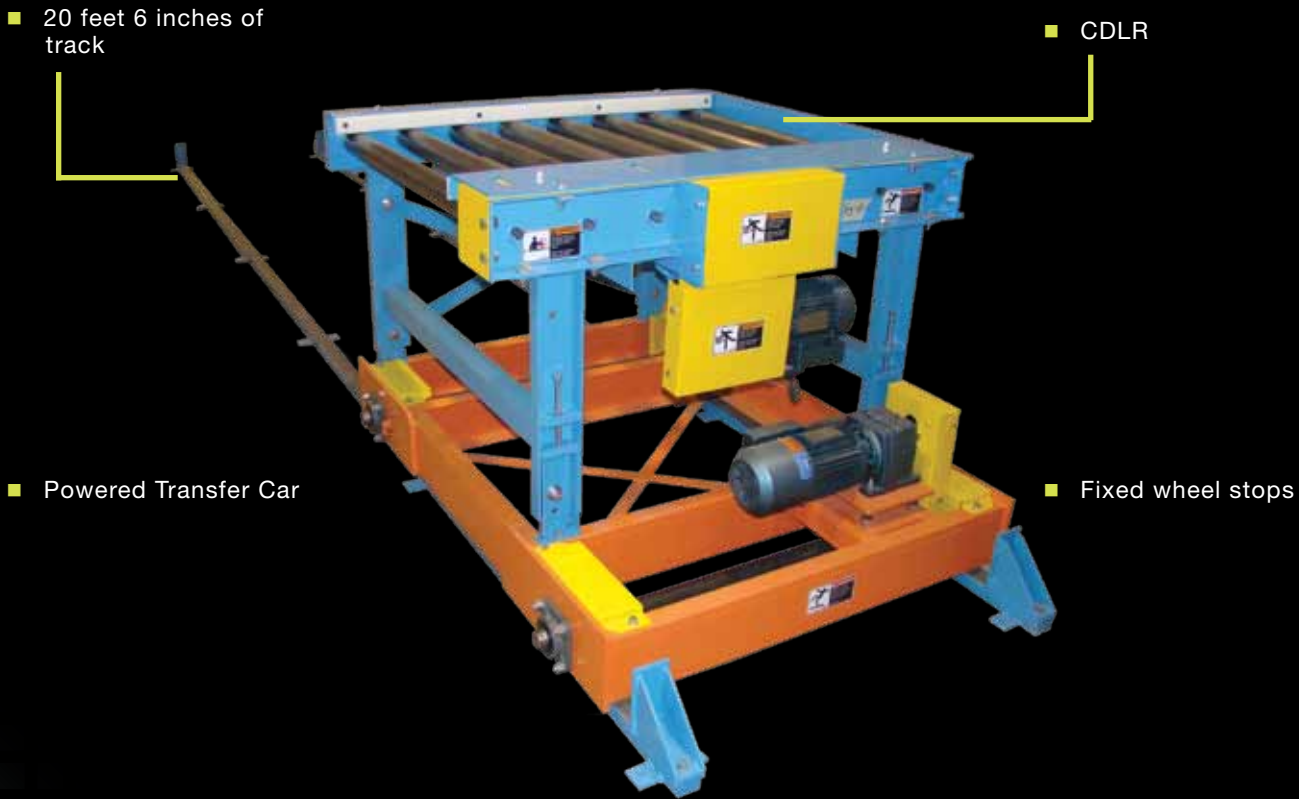

THE APPLICATION: Transferring Empty Pallets for Cylinder Remanufacturing

THE PRODUCT: Powered Transfer Car with Chain Driven Live Roller Conveyor

THE INDUSTRY: Agricultural Equipment and Machinery Manufacturing

THE NEED: An agricultural machinery manufacturer needed to reduce manual labor and create a more efficient system of transferring empty pallets for reuse.

THE SOLUTION: Omni Metalcraft Corp. provided Chain Driven Live Roller Conveyor mounted on top of a Powered Transfer Car to transport empty steel pallets. An operator would load a cylinder head onto the pallet, complete the required prep work and release the cylinder for further processing down a line of CDLR onto another transfer car at the end.
