

## VACUUM CUP GRAVITY CONVEYOR NO: 701

**THE APPLICATION:** Portable lightweight panel drill press workstation

**THE PRODUCT:** PVC Roller Gravity Conveyor with Vacuum Cups

**THE INDUSTRY:** Panel Fabrication

**THE NEED:** A Panel Manufacturer needed a portable workstation to move different size layers of lightweight paneling as well as hold the paneling in place without marking or damaging it.

**THE SOLUTION:** Omni Metalcraft Corp. worked with the customer's design to provide a portable PVC Roller Gravity Conveyor equipped with Vacuum Cups. The lightweight gravity conveyor was designed with casters so the conveyor could be easily moved to and from the drill press workstation. Adjustable vacuum cups were integrated into the bed of the conveyor at set increments for "suctioning" different size panels in place to be drilled.
