

INKJET PRINTING AND CASE TURNING NO: 506

THE APPLICATION: High Resolution Inkjet Printing and Case Turning

THE PRODUCT: Plastic Belt Conveyor

THE INDUSTRY: Consumable Goods

THE NEED: A solvent manufacturer needed to turn a case and print a high resolution barcode cost effectively.

THE SOLUTION: Omni Metalcraft Corp. responded to the customer's design needs and provided a Modular Plastic Belt Conveyor outfitted with a flat top belt. The conveyor was also equipped with an adjustable bump turn. The case of solvent conveyed smoothly through the printing process providing a positive barcode that could be read, while the low friction modular plastic belting allowed for clean case turning.

■ Case aligning prior to printing

■ High resolution barcode

■ Adjustable bump turn

■ Low friction modular plastic belting

■ Smooth, even conveyance through the printing process
