

HEAVY DUTY ROLL HANDLING TURNTABLE NO: 208

THE APPLICATION: Conveying Large Rolls of Tissue Paper Product

THE PRODUCT: Infeed and Discharge Chain Driven Live Roller Conveyor and Custom Turntable with Integral Chain Driven Live Roller Conveyor

THE INDUSTRY: Paper

THE NEED: A tissue paper manufacturer was installing a new line into an existing facility. They needed a system of conveyors that would transport various sized rolls up to 12,000 lbs. The conveyors needed to integrate with additional equipment provided by other OEMs.

THE SOLUTION: Omni Metalcraft Corp. provided Heavy Duty Chain Driven Live Roller Conveyor feeding and discharging a large diameter Turntable for transitioning various sized rolls 90 degrees. The system started at the lower level of the facility conveying raw rolls of tissue into a Reciprocating Vertical Conveyor, outfitted with Omni CDLR mounted integral. The roll was then transitioned to the second level, conveyed into a stretch wrapper and out to shipping.

- Welded construction
- 12 inch roller centers
- Precision drive rollers
