

STAINLESS STEEL TOTE HANDLING NO: 104

THE APPLICATION: Stainless steel conveyors for bulk tote handling

THE PRODUCT: Stainless Steel Chain Driven Live Roller & Chain Transfer Conveyor

THE INDUSTRY: Food, Beverage, Pharmaceutical, Corrosive Industrial

THE NEED: A food manufacturer needed a washdown, heavy duty 90° transfer conveyor system for food product unloading.

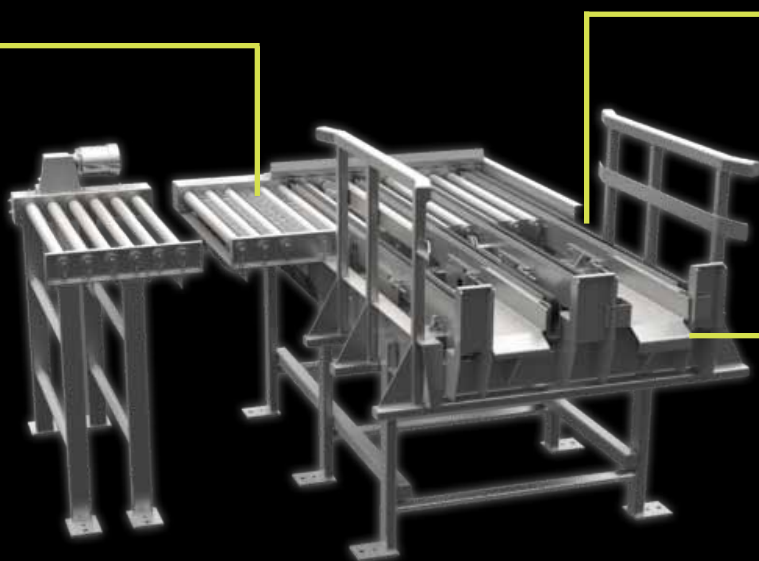

THE SOLUTION: Omni Metalcraft Corp. can provide stainless steel, washdown rated Chain Driven Live Roller Conveyor with Chain Transfer Conveyor that extends beyond the conveying surface of the roller conveyor to accept fork truck loading.

■ Stainless steel filler plates between rollers allow closer product access

■ Custom heavy duty tubular side guides assist fork truck loading operation

■ Washdown rated motors and reducers

■ High capacity external bearing rollers eliminate water and bacteria in tubing

■ Multi-strand corrosion resistant chain support, strength, and washdown application

■ 304 stainless steel frames, rollers, bearings and support structure

■ Guarding for fork truck loading of tote on the chain transfer

■ Heavy duty support structure
