

WOOD FINISHING BELT CURVE NO: 404

THE APPLICATION: Handles products of diverse sizes and maintains their orientation

THE PRODUCT: Power Turn Belt Curve

THE INDUSTRY: Furniture Manufacturing

THE NEED: A manufacturer needed to convey a diverse range of product sizes through a curve. The products of various size needed to turn without losing their original orientation, remaining centered and square.

THE SOLUTION: Omni Metalcraft Corp. provided a Power Turn Belt Curve that would not only be able to stand up to the demanding environment but convey a wide range of products from large flat boards to individual cabinets. The durable, easy to maintain design provides a simple design solution.

■ Non-marring rough top belt

■ Chain-free guiding system

■ Easy to maintain design

■ Maintains product orientation throughout the turn

■ Powered or gravity transition rollers available

■ Various shape and size product capability

■ Variable speed reducers to refine throughput

■ Jack bolt adjustable legs for fine tuning
