

## 45053-GP

Load Capacity	603 lbs
Temp. Range	-40°F to 250°F

### Features

- Unground, non-precision
- Stamped metal construction
- Zinc plated mild steel
- Full ball compliment
- Front polymer seal
- Front and rear shields
- Machined metal adapter
- Replaceable
- Grease packed

### Application Info

This assembly is designed specifically for 3.5 x 7 ga. tubing as an alternative to using .300 wall tubing. Recommended for slow speed powered conveyor and gravity conveyor applications. Not recommended for high speeds. A metal shield ring supports a polymer sealing ring to hold out small amounts of large particle debris. Not recommended for extremely dusty environments.

### Similar Bearings

45054-GP is an equivalent ABEC bearing.

### Special Notes

102061-GP is the bearing part number.

45051-GP is the sleeve part number.
