

45409-GP

Load Capacity	1497 lbs
Temp. Range	-10°F to 225°F

Features

- ABEC-1 precision
- Hardened chrome steel
- Precision ground finish
- Front and rear shields
- Front and rear seals
- Ball retainer
- Machined metal adapter
- Grease packed

Application Info

This is one of our most highly recommended bearings. It is ideal for heavy loads and long service life in extremely dirty environments including foundries and concrete plants. Metal shields deflect large particle debris and protect a rubber contact seal that is very effective against fine dust and other small particle debris. The seals add rotational drag and are not recommended for gravity applications with light product. Recommended for powered applications where roller resistance is not an issue and the roller is constantly rotating.

Special Notes

114621-GP is the bearing part number.
45344 is the adapter part number.
