

HEAVY DUTY  
HYDRAULIC LIFT

PNEUMATIC LIFT

## RISING TO THE CHALLENGE

Omni Metalcraft Corp. offers one of the most complete material handling component product lines in the industry. Our extensive line of scissor lifts are designed specifically to promote quality and efficiency in the workplace. Omni scissor lifts have been successfully utilized in multiple industries (including harsh environments, automotive and food manufacturing) for many years. We work closely with our customer to build the right scissor lift for the specific application and because all of our products are designed with consideration given to optimizing integration, purchasing from Omni minimizes the issues that often arise when components are received from several different manufacturers. This is the Omni advantage.

# STAINLESS STEEL & BUILT TO ORDER

Omni Metalcraft Corp. is able to provide unique equipment designs or any special features necessary to meet the requirements of your specific application. Omni combines industry experience, proven engineering standards and design flexibility to provide the right solutions for applications that require stainless steel materials or the integration of other material handling equipment. We encourage you to challenge us with your custom scissor lift, whether for food handling, high cycles or a washdown application in a harsh environment, Omni can provide the solution.

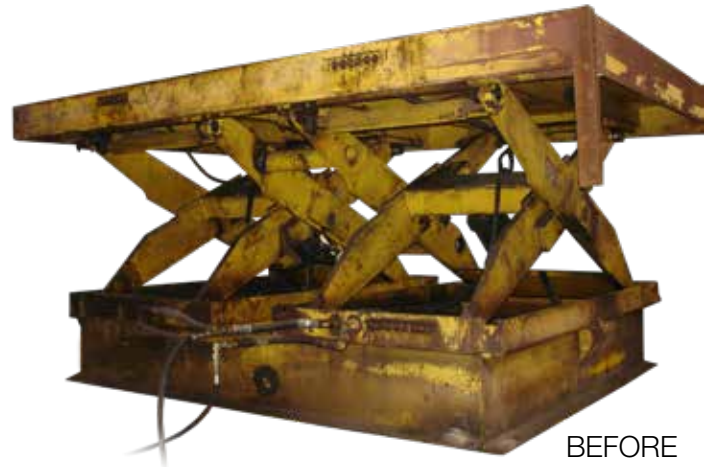

## COMMON BUILT TO ORDER REQUESTS

- Stainless steel cylinders & wash down power units
- High cycle auto lube packages
- Scissor lifts integrated with assembly fixtures and other equipment
- Scissor lifts with tilters for assembly applications
- Scissor lifts with mobility packages
- Custom platform configurations
- Private labeling

## OMNI REMAN PROGRAM GIVING YOUR LIFT A NEW LEASE ON LIFE

### What is the Omni Reman Program?

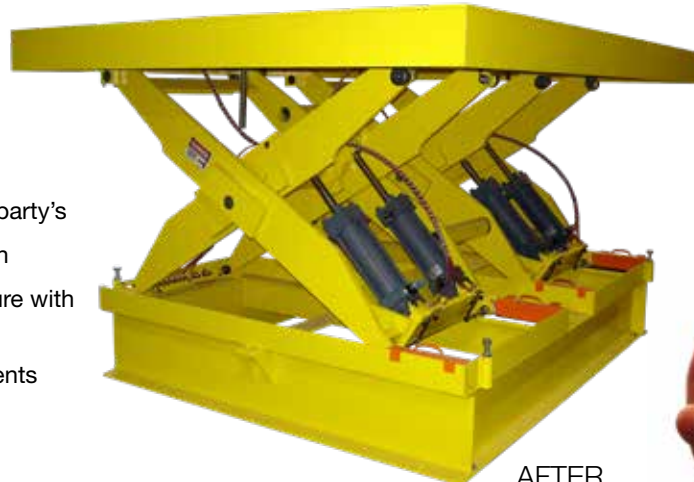

Simply stated, our remanufacturing is a process whereby the original product is disassembled, the welds are inspected, parts are cleaned, corrosion and rust are removed, worn or obsolete parts are replaced and the equipment is painted and reassembled to sound working conditions that meet or exceed Omni Metalcraft's original specifications. A "restored to new condition" scissor lift will be returned to the customer with a matching warranty at a fraction of the cost of purchasing new equipment. The customer is entitled to participate in this program with the purchase of a scissor lift and for more information on the Omni Reman Program, contact us today.

BEFORE

### ADVANTAGES OF REMANUFACTURING

- Increased return on investment
- Extended life cycle on existing equipment
- Remanufactured to OEM specifications, not a third party's
- "As good as new or better", with a warranty to match
- Equipment can be retro-fitted at time of remanufacture with other equipment
- Lift will be up to date with the latest safety requirements
